

Own the best looking house on the block.

Interior Painting Procedures

Step 1: Color Selection: Color Selection starts with visiting your local paint store. The staff can help guide you in picking the right colors for your project. If a color consultation is needed, please reach out to your estimator for more information. The final color and sheen selection is the responsibility of the client.

Step 2: Taping: All floors and furniture in the room will be covered to ensure the paint does not get on anything. We ask all furniture to be pushed to the center of the rooms before the crew arrives. We can assist with larger items if needed.

Step 3: Removal: The light switch and outlet covers will be removed by the crew. We ask that the client removes any items from the walls, including electronics and window blinds/curtains. We also ask that the client wipe down any areas to be painted to ensure any dust, dirt or debris is not present on the surfaces to be painted.

Step 4: Patching: If needed, any holes in the walls that are smaller than a dime will be patched and sanded. If repairs are required for holes or larger areas, a separate price will be given to repair those areas.

Step 5: Taping: As needed, areas will be taped off where appropriate to ensure clean lines.

Step 6: Priming: Any bare wood or drywall will be primed with the appropriate primers. If an area has dark or deep-based paint that is getting painted over with a light color, a full primer coat will be needed. Please check with your estimator to ensure this work has been included in the painting proposal.

Step 7: Painting: After the room has been made ready, we will paint using the best quality paints and applicators.

Step 8: Daily Cleaning: On multi-day jobs, we make sure to pack up and pick up at the end of the day.

Step 9: Final Inspection: Before the crew packs up their equipment, we do a final walk-around to ensure all contracted areas are painted properly.

Step 10: Review: At the end of each job, we ask our customers to complete an online review to ensure that all work has been performed to meet or exceed your standards.
